Professional Summary

Computer Science graduate with experience spanning software development, IT support, Linux systems, hardware diagnostics, networking, audio-visual technology, and technical troubleshooting. Experienced designing software applications, developing REST APIs, building machine learning models, and supporting enterprise technology deployments. Passionate about solving technical problems, learning new technologies, and communicating effectively with both technical and non-technical users. Seeking opportunities to apply a broad technical skill set in software engineering, information technology, systems administration, or related technical roles.

Education & Certifications

Western Governors University

Bachelor of Science – Computer Science

Graduated: May 2026

Linux Professional Institute

LPI Linux Essentials

Technical Skills

Languages:	C, C++, C#, Java, Python, JavaScript, TypeScript, SQL, Bash
Web & Backend:	HTML, CSS, React, Angular, Bootstrap, Node.js, Express.js, Spring Boot, REST APIs, CRUD, JSON, HTTP, API Integration, MVC
Databases & Tools:	MySQL, Relational Database Design, Data Modeling, Git, GitHub, Docker, Postman, Jupyter Notebook, Visual Studio, Visual Studio Code
Systems & Networking:	Windows, Linux, macOS, TCP/IP, DHCP, DNS, Active Directory, Windows Firewall, Port Forwarding, Dedicated Server Hosting, Network Troubleshooting
Hardware & IT:	Desktop Diagnostics, Hardware Repair, Peripheral Troubleshooting, Device Testing, System Configuration, Cable Testing, Cable Repair & Soldering, Equipment Evaluation

Software Projects

Clash Tracker

[Node.js](#) [Express](#) [TypeScript](#) [REST](#) [MySQL](#) [Git](#)

Production-style backend application for tracking Clash Royale player statistics through the official API.

- Designed 20+ REST API endpoints supporting player statistics and battle history retrieval
- Designed a relational database supporting persistent player and battle history data
- Integrated the official Clash Royale API with request validation and structured error handling
- Designed a scalable backend architecture supporting future frontend integration and user accounts

Earthquake Magnitude Prediction

[Python](#) [Machine Learning](#) [Jupyter](#) [Git](#)

Machine learning capstone project predicting earthquake magnitude from historical seismic data.

- Prepared, analyzed, and preprocessed real-world seismic datasets
- Developed regression-based machine learning models and performed feature engineering
- Evaluated model performance using MAE, RMSE, and R^2
- Demonstrated a near-zero R^2 , indicating that geographic location alone is not a meaningful predictor of earthquake magnitude.

Technical Experience

TEL Systems — Audio-Visual Installer / Technician

Aug 2026 – Present

Install and support commercial audio-visual and technology systems for higher education, K-12, public safety, and other enterprise clients while coordinating with on-site IT personnel and project teams.

- Install, configure, and troubleshoot professional commercial audio-visual and technology systems across 20+ enterprise client sites.
- Interpret technical documentation, installation drawings, and project specifications.
- Diagnose hardware, connectivity, and system issues during installations.
- Collaborate with customer representatives, IT departments, project managers, and installation teams on large-scale deployments.

Senior Software Developer Apprenticeship — Leroy Eberly, Senior Software Developer at Tegrit

Jul 2026 – Present

Ongoing software development mentorship focused on professional engineering practices and application design.

- Software engineering best practices, code reviews, and professional development workflows.
- Object-oriented programming, software architecture, and application design.

Metro City Church — <i>Technical Volunteer</i>	<i>May 2026 – Present</i>
Diagnose, test, troubleshoot, and repair computer hardware, electronics, audio-visual systems, and other technical equipment.	
• Evaluate donated hardware for refurbishment, repair, or reuse. • Troubleshoot production audio/video systems and repair speakers, security cameras, and other electronic equipment. • Test XLR and other signal cables; document equipment condition and repair status. • Repaired and refurbished over \$1,000 worth of donated technology	

Additional Professional Experience

Kroger — <i>Dairy Clerk</i>	<i>Aug 2025 – Mar 2026</i>
Maintained a clean and well-stocked department while ensuring product availability and organization.	
Chick-fil-A — <i>Front of House Team Member</i>	<i>Mar 2023 – Aug 2025</i>
Provided friendly, fast, and professional customer service in a high-volume team environment.	
Blue Raven Solar — <i>Solar Sales Representative</i>	<i>Aug 2022 – Mar 2023</i>
Educated homeowners on residential solar energy solutions and assessed customer needs.
